

Freelance Manager Upgrade 1.06

NOTE: PLEASE COMPLETE ALL THE STEPS TO UPGRADE FREELANCE MANAGER TO V.1.06

In order to upgrade to 1.06, you must have already installed 1.05.

During upgrade process some of the original files will be replaced. However your database will be preserved. It's recommended to perform backup before proceeding.

1. Backup Your Database

2. Backup the following files if you've made any changes to it:

print_invoice.php

print_pdf.php

/admin/print_invoice.php

/admin/print_pdf.php

all files in /mailer/

3. Unzip the upgrade (upgrade.zip) package into your FM directory.

4. Open your browser and point to <http://yourdomain.com/upgrade.php>

where yourdomain.com is the name of your domain. If you've installed FM in other than root directory of your domain, then just add your install directory after <http://yourdomain.com/> e.g.:

<http://yourdomain.com/cmsdirectory/upgrade.php>

5. Once install completed you'll see the message:

Installation Completed. Please delete **upgrade.php**

Make sure you delete the file.

6. Add the following to your language.php file:

After:

'STATE' => 'Province/State',

add:

'COUNTRY' => 'Country',

After:

'MENU_CI' => 'Create Invoice',

add:

'MENU_VI' => 'View Invoices',

After:

'CONF_TAXRATE' => 'Tax Rate',

add:

'CONF_TAXNO' => 'Tax/VAT Number',

'CONF_TAXNO_T' => 'This is your Tax/Vat/Business number that will appear on all your invoices',

7. Open up /lib/config.ini.php and replace:

\$DEBUG = false;

with:

```
define('DEBUG', false);
```

What's new in this version:

1. Added country field to user/staff profile and registration process
2. Added Tax/Vat/Business number that will appear on all invoices
3. You can now have different logo for invoices/email templates.

Upload your new logo in **/uploads/** folder and name it **print_logo.png**. All lowercase. Your logo could be 24 or 32 bit png. Even if your logo is .jpg format you can just save it as png using any photo editor.

You don't have to use different log if you don't want to. The system will look for print_logo.png first, than your site logo, if none of the exist company name will be used instead.

Fixed:

- file download from client side
- staff permissions for tasks
- staff permissions for tickets
- fixed Day of the week in configuration
- welcome admin spacing
- menu name for invoices
- missing logo in print invoice and print invoice pdf (if no logo exists company name will be used instead)
- if using mysql 5.0 you might receive an error message on main index page in admin area

Enjoy new features of Freelance Manager 1.06
